

Your blueprint for reducing cloud risk

“Wiz gives a high-growth startup like Redis a very mature capability out of the box that would be very, very costly and labor intensive to create on its own.”

Quincy Castro
Chief Information Security Officer

See Wiz in action: wiz.io/demo

Rapid innovation, limited security and development resources, and an ever-evolving risk landscape have led to a reassessment of cloud security strategy for cloud and growth-focused organizations. Whether organizations are replacing their cloud-native security tools or starting their cloud security journey, cloud and growth-focused organizations need complete visibility of their cloud, maintain compliance, scale their security programs, and enable the organization to ship products faster.

Wiz is a modern, scalable approach to cloud security that simplifies and prioritizes critical issues. Wiz brings together security, development and Ops teams into one security program so that they can understand and control risks across the pipeline. Confidently adopt cloud-native technologies, break-down silos, and ship innovative products without worry.

Wiz is a unified approach to cloud security

- Security Posture Management (CSPM)
- Workload Protection (CWPP)
- Vulnerability management
- Infrastructure Entitlement Management (CIEM)
- CI/CD security (IaC, VM/container Image, registry scanning)
- Cloud Detection and Response (CDR)
- Container and Kubernetes Security
- Data Security and Posture management (DSPM)

100% visibility in minutes

Wiz connects in minutes and scales to any cloud environment with zero impact on resource or workload performance. It builds an inventory of every technology running in your cloud and delivers unified visibility from every layer of your cloud stack with the industry's first agentless, graph-based platform.

Fix what matters most

Prioritize the most critical risks with actionable context. Wiz continuously analyzes your entire security stack to uncover the toxic combinations that represent real risk while eliminating the manual work of sifting through and analyzing siloed alerts.

Scale security

Ship faster by eliminating operational silos and empowering cross-functional teams to proactively fix and prevent issues across the development lifecycle. Project-based workflows and remediation guidance help remove guesswork, and optional auto-remediation supports fixing misconfigurations with a single click.

Wiz is the fastest growing cybersecurity company in the world. We're on a mission to help every organization build in the cloud securely.

Purpose-built for the unique complexities and workflows of cloud and hybrid environments, Wiz brings together sec, dev, and ops teams into one cloud security program.

"When you start to truly scale outside of that one and two account footprint in the cloud, where a relatively small team can keep an eye on it, Wiz is a truly a best-in-class solution."

Darcy Boynton
Manager, Security and Network Operations

"Trying to bridge the gap between development teams who just want to move fast and our security team's need to protect the company was a real challenge. We needed a way to give developers the autonomy they need while still providing the visibility and control that our security team needs."

Gai Hanochi
VP, Business Technologies,

"Even as we expand usage of Wiz to DevOps, it will be a force multiplier for our headcount. Wiz doesn't require adding more resources to have a wider reach across our organization."

Adam Schoeman
CISO

"Wiz was extremely useful with Log4j. It allowed us to evaluate our real attack surface. Knowing what you have out there is half the battle."

Tomi Tuominen
VP, Security

About Wiz

Wiz secures everything organizations build and run in the cloud. Founded in 2020, Wiz is the fastest-growing software company in the world, scaling from \$1M to \$100M ARR in 18 months. Wiz enables hundreds of organizations worldwide, including 20 percent of the Fortune 500, to rapidly identify and remove critical risks in cloud environments. Its customers include Salesforce, Slack, Mars, BMW, Avery Dennison, Priceline, Cushman & Wakefield, DocuSign, Plaid, and Agoda, among others. Wiz is backed by Sequoia, Index Ventures, Insight Partners, Salesforce, Blackstone, Advent, Greenoaks and Aglaé.
